Construction Season is Starting Soon!

CSAH 22 Resumes in Spring 2021 and CSAH36 on the Horizon

Construction on CSAH 22 (TH112 Turnback) will resume in May. Stages 1 and 2 were completed last year and stages 3-5 will occur in 2021; with an anticipated end date of October 2021.

Stage 3 (May-August) focuses on the South end of the project area. Stage 4 is slated to being in June and includes a portion of Ferry Street (in front of the Community Center and Middle/High School) and is anticipated to be completed in July. Stage 5 is scheduled for May-October and consists of the North end of town. We will provide additional information about these projects in the coming months and encourage residents to follow our social media pages for the most up-to-date information. Project updates can also be found and delivered straight to your inbox by visiting: <https://clients.bolton-menk.com/new22/>.

City Council has approved a feasibility report for the proposed work to be done on the CSAH 36 area. This area is comprised of South Main Street and Ferry Street. Similar to CSAH22, this project is a complete reconstruct consisting of replacement of utilities, curb, gutter, sidewalk, and pavement. This includes the City parking lot west of Ferry Street. Neighborhood information meetings and a public improvement hearing are scheduled next month.

If you are a property owner along this project area and currently have any stormwater issues, please reach out to us (ponds in your front yard, etc.) to assist with construction planning.
